

Sensory Interaction between Visual and Vestibular System in Virtual Reality

Nils Henrik Seitz*
Universitt Rostock

ABSTRACT

Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue duis dolore te feugait nulla facilisi. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad minim veniam, quis nostrud exerci tation ullamcorper suscipit lobortis nisl ut aliquip ex ea commodo consequat. Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue duis dolore te feugait nulla facilisi.

Keywords: Visual-vestibular conflict, motion sickness, cyber sickness,

Index Terms: H.1.2 [Models and Principles]: User/Machine Systems—Human factors, Human information processing; H.5.1 [Information Interfaces and Presentation (e.g., HCI)]: Multimedia Information Systems—Artificial, augmented, and virtual realities;

1 INTRODUCTION

2 METHODS

3 RESULTS

4 CONCLUSION

ACKNOWLEDGMENTS

The author would like to thank Amon Ties Uerckwitz for the co-operation during preparation of the subject "Human Factors and Perception".
